MY WORKS

01. **Project Name: PHP Mini MVC Framework (By using some laravel concepts)**
    This is a simple PHP mini MVC framework by using MVC design patterns like as llaravel.
    I have integrated model, view, controller, routing, middleware, service container, helper
    functions, composer etc.

    ➢ **Github Repository Link:** https://github.com/anwar7736/PHP-Mini-MVC-Framework

02. **Project Name: Laravel Simple Shopping Cart Package**
    This is a simple laravel shopping cart package. I have completed this package by using laravel
    service container, service provider, facades, session etc.

    ➢ **Github Repository Link:** https://github.com/anwar7736/laravel-simple-shopping-cart-package

03. **Project Name: Laravel Simple Contact Us Package**
    This is a contact us package. When any visitor visit your website (Contact us page) and they can
    send a message to you. This package automatically send a mail to you and it's store to your
    database table. I have used laravel model, view, controller, route, migration, mail server etc.
